## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 6,127,241 to Rha.

Regarding claim 1, Rha teaches an isolation structure (Fig. 2A), comprising:  
a semiconductor substrate (20); and  
an electric isolation region embedded in the semiconductor substrate, wherein the electric isolation region comprises a bubble-implanted (26) semiconductor region and an electrically insulating cap region (27a) on top of the bubble-implanted semiconductor region.

Regarding claim 2, Rha teaches an isolation structure, wherein a top surface of the electrically insulating cap region is essentially at a same level as a top surface of the substrate.

Regarding claim 6, Rha teaches an isolation structure, wherein the electrically insulating cap region comprises silicon dioxide (Col. 3, lines 22 – 29).

***Allowable Subject Matter***

3. Claims 3 – 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 7 – 20 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach, alone or in combination, a method for forming an isolation structure, including “implanting gas bubbles into a semiconductor region” and “forming an electrically insulating cap region on top of the bubble-implanted semiconductor region.”
